PERSONAL PROFILE

With over 12 years of comprehensive experience as a software application developer, I have cultivated expertise in designing and delivering innovative, high-performance solutions. My expertise spans between front-end and back-end development, reinforced by a deep understanding of diverse programming languages, frameworks, and databases. This extensive technical acumen, combined with a demonstrated history of successfully executing complex projects, establishes me as a valuable asset for any software development team.

WORK EXPERIENCE

TRION TECHNOLOGIES — Mandalay, Myanmar

System Analyst & CTO — 05/2022 – 04/2026

- Gather and analyze business requirements to create functional and technical specifications for software solutions.
- Ensure seamless integration of new software with existing systems and external applications.

Senior Software Developer — 05/2015 - 04/2022

- Proactively researched emerging technologies, designing, developing, and maintaining high-performing software applications to address complex client needs.
- Directed and mentored junior developers, fostering a culture of excellence while producing and maintaining clean, efficient, and scalable code.

Junior Software Developer — 11/2011 - 04/2015

- Focuses on coding, development, and maintenance of software applications.
- Debugged and resolved software issues.

FREELANCE SOFTWARE DEVELOPER — Singapore

2019 - 2020

Experience includes working as a freelance software developer, taking on projects for various clients and showcasing a diverse set of skills in the portfolio.

Programming Languages:
- C#
- JavaScript
- TypeScript

Frontend:
- Angular
- Ionic Framework

Backend:
- ASP.NET / ASP.NET Core
- Node.js / Express.js

Database:
- Microsoft SQL Server
- MySQL

Data Access:
- Dapper
- Entity Framework Core

Tools:
- Visual Studio
- VS Code
- Crystal Reports
- Git / GitHub

SOFT SKILLS

- Self-Learner
- Good communication skill
- Leadership Quality
- Good team player
- Problem solving

PROFESSIONAL EXPERIENCE

➢ My Clinic

Role : System Analyst
Platform : Web/Mobile
Technologies : ASP.NET (Blazor), C#, Dapper, Typescript, MS SQL
Responsibilities :

- Optimized data access and improved application performance using C# and Dapper.
- Utilized TypeScript to enhance front-end interactivity and user experience.

➢ HMS (Hospital Management System)

Roles : Junior/Senior Developer, System Analyst
Platform : Windows
Technologies : C#, MS Visual Studio, MS SQL, Crystal Reports
Responsibilities :

- Orchestrated comprehensive enhancements to hospital management software systems to ensure optimal performance and functionality.
- Collaborated with cross-functional teams to analyze system requirements and implement system enhancements.

➢ Attendance and Payroll Management Application

Roles : Senior Developer, System Analyst
Platform : Windows
Technologies : C#, MS SQL, Crystal Reports
Responsibilities :

- Customized and refined payroll management software to align with specific client requirements, achieving a 15% uplift in customer satisfaction ratings.

➢ AI Interview Assistant

Role : Full Stack Personal Project | 2026
Technologies : Angular, TypeScript, Node.js, Express.js, PostgreSQL, JWT Authentication, Open AI API, Netlify, Render
Responsibilities :

- Developed and deployed a full-stack AI Interview Assistant using Angular, Node.js, Express, and PostgreSQL.
- Implemented JWT authentication, session-based chat history, and CRUD operations.
- Integrated Open AI/Open Router APIs for AI-powered interview practice.
- Built responsive UI with Dark/Light Mode and deployed via Netlify and Render.

➢ Lottery Application

Roles : System Analyst, Senior Developer
Platform : Web/Mobile
Technologies : PHP, Ionic, Nodejs, XAMPP, Typescript
Responsibilities :

- Spearheaded the end-to-end development and deployment of a scalable lottery application, delivering seamless functionality across web and mobile ecosystems.
- Executed backend improvements with Node.js.

➢ Mitsubishi survey truck report

Role : Freelance Developer
Platform : Web
Technologies : MS SQL, ASP.NET (Razor), Crystal Reports
Responsibilities :

- Optimized data entry processes to improve accuracy.
- ASP.NET (Razor) and Crystal Reports to create and deploy solutions that met project needs.

➢ TACC (Trion Account Application)

Roles : Junior/Senior Developer, System Analyst
Platform : Windows
Technologies : C#, MS Visual Studio, MS SQL, Crystal Reports
Responsibilities :

- Collaborated with multidisciplinary stakeholders to streamline requirements gathering and implementation.

➢ Green Land Application (HR)

Role : Senior Developer
Platform : Web
Technologies : Angular, TypeScript, Node.js, MySQL
Responsibilities :

- Modified the government HR implementation of the MVVM design pattern, improving code maintainability and scalability by 50%.

➢ Hotel Management Software-Hotelier

Role : Junior Developer
Platform : Windows
Technologies : C#, WPF, MS SQL, Crystal Reports
Responsibilities :

- Assisted in debugging and optimizing application code, leading to a 20% decrease in system errors.
